

Perimeter Defense Plan

The Email Security Imperative

Email-based cyberattacks continue to be a leading cause of disruption, data loss, and financial damage, so there's no question that a robust security program starts with great email security. Protecting Microsoft email becomes even more important as more companies adopt Microsoft 365 making it a gold mine for threat actors. No matter your organization's size or where your employees are working from, protecting email is essential to your bottom line.

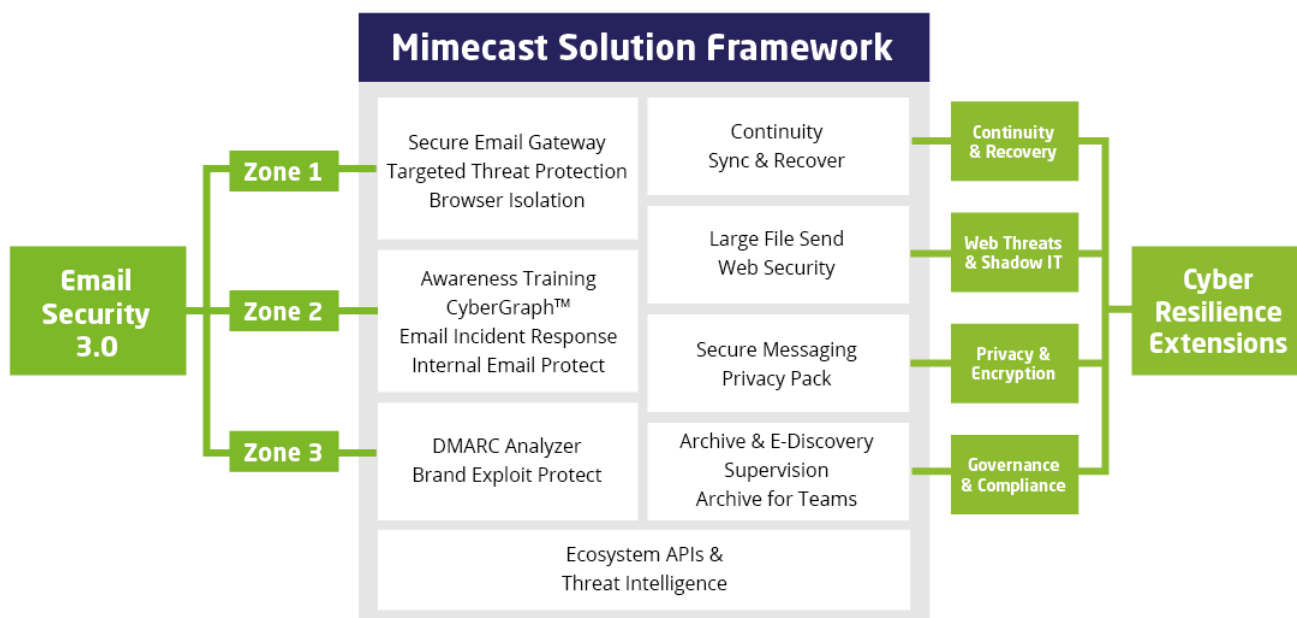

With the Mimecast Perimeter Defense plan, we've got you covered. You get the most sophisticated protections available for targeted threats, malicious URLs, attachments, impersonations, and spam – all delivered in the simplest way possible.

Key Benefits

- Safeguards your organization against threats from the number one attack channel
- Prevents financial loss and the exposure of sensitive or proprietary information
- Reduces complexity and administrator time

Security You Can Count On

- Prevention of business email compromise, phishing, and spear-phishing
- Neutralization of malicious URLs, attachments, spam and malware
- Protection for employees – both in the office and remotely

Secure Email Gateway

- **Anti-Virus and Anti-Spam** – Comprehensive protection delivered via multi-layered engines with an optimum mix of proprietary and best of breed third-party technology
- **Data Loss Prevention** – Protect your sensitive and confidential information from accidental or intentional exposure with fine grained policy controls
- **Signature Disclaimer & Management** – Achieve consistency in all email communications with email signature and disclaimer management based on Active Directory credentials
- **End User Productivity Applications** – Boost your employee productivity with self-service security, email and archive access features with apps built for Outlook, mobile, Mac and Web
- **Intelligent Email Routing** – Support complex on-premises, cloud, or hybrid email environments and achieve rapid email system integration or separation associated with a merger, acquisition, or divestiture
- **Threat Intelligence** – Gain insight into threats targeting your tenant with the Threat Intelligence Dashboard or use our Threat Intelligence API to feed threat data into a third-party tool of your choice
- **API (Application Programming Interface)** – Create an extensible architecture for complete visibility and efficiency by integrating Mimecast with your current or planned IT solutions

Targeted Threat Protection

- **URL Protect** – Protect your organization and employees against malicious websites containing malware, phishing and other threats through URL rewriting and on-click deep site inspection
- **Attachment Protect** – Defend against infection from weaponized attachments often used in ransomware, keylogger, trojan and spyware attacks with multi-layered inspection including advanced static and dynamic analysis
- **Impersonation Protect** – Comprehensive protection against social engineering attacks like Business Email Compromise, CEO fraud and phishing targeting your employees
