

SYGNIA

INCIDENT RESPONSE SERVICE

We Don't Just Secure Networks,
We Secure Your Business

When confronted with a breach, you need the best team at your side. Described by Forbes as a “Cyber Security Delta Force,” Sygnia’s global response teams draw on top talent from elite military technology units who have extensive experience guiding and assisting organizations through complex cyber incidents. Since 2015, Sygnia has adopted a hands-on, gloves-off approach to supporting high profile organizations across all industries in times of crisis. Whether you are confronting a criminal group, a state-sponsored actor or an insider threat, Sygnia will help you swiftly investigate, contain and defeat the attack within your network while minimizing the impact to your business.

Cyber threats continue to mount in audacity, sophistication, and speed. Attackers are taking advantage of new opportunities created by the accelerated transition to cloud and remote working. Sygnia’s combination of technological agility and depth, talent for anticipating an attacker’s next move, and ability to leverage both commercially available capabilities and proprietary technologies will deliver you through any predicament.

Each day our teams of response experts, forensic specialists, data scientists, and security engineers are at the ready helping clients resolve incidents and accelerate business recovery.

“**Forbes**

Often described as a Cyber Security Delta Force... [Sygnia] has developed a reputation for speed and decisiveness in responding to attacks and helping Fortune 100 companies build their cyber resilience.”

TYPES OF INCIDENTS

FINANCIAL CRIME

Extortion and ransomware, business email compromise (BEC), payment card data theft, financial theft, and cryptojacking.

DATA BREACH

Personally identifiable information (PII), intellectual property and other types of sensitive data that could potentially expose your business or your customers.

NATION STATE THREATS

Stealth attacks aimed at espionage or destruction, often conducted by skilled actors maintaining persistence in the network.

DESTRUCTIVE ATTACKS

Targeted malware deployed to cause business disruptions.

INSIDER THREATS

Malicious activities performed by employees, contractors or other insiders.

THE SYGNIA WAY

OUR APPROACH TO INCIDENT RESPONSE

Sygnia swiftly and decisively partners with you to minimize the impact of an incident on your business.

IMMEDIATE RESPONSE

Our 24/7 incident response global coverage team is on standby to respond to your call and immediately evaluate the situation. As a first step, we triage and assess the level of risk to establish an initial understanding of the situation.

PARTNERING WITH LEADERSHIP

When an incident occurs, we help you manage the crisis legally and in the public domain. Shareholders, stakeholders, employees and the general public will be looking for answers. Communication is key.

IN-DEPTH INVESTIGATION

To establish an understanding of the attack, scope, and level of threat, we use the tools available in your network and, when necessary, deploy our proprietary technology to identify root cause, attack vectors, timeline, and any remaining threat actor capabilities.

REMIEDIATION & RECOVERY

Once we remove the threat from the network and deny threat actors the ability to reestablish access, we support remediation and the recovery of affected systems and business processes. Our goal is to bring the event to closure with minimum damage.

REPORTING

We deliver high level and detailed reports, as required by law enforcement, insurance providers and senior management, that identify the business impact, investigation details, and strategic remediation recommendations to further bolster your cyber resilience.

Times of crisis can be overwhelming. With Sygnia, we stand shoulder to shoulder to provide guidance every step of the way.

THE SYGNIA DIFFERENCE

OPERATIONAL ART

We deploy special forces-trained talent who apply the mindset of elite military units. By employing digital combat experience and assuming an attacker mentality to respond to incidents, we help you build resilience.

ATTACKER PERSPECTIVE

Cyber attacks are a mind game. You need to think like an attacker and emulate their tactics to win the battle. We defeat attacks by applying decades of experience masterminding state-level cyber operations.

TECHNOLOGICAL MASTERY

We bring together the most sophisticated technological response teams and proprietary technology to help your organization. Our teams combine consultants, forensic experts, security architects, adversarial security experts, data scientists, law enforcement and legal.

SPEED & DECISIVENESS

When under a cyber attack, every minute counts. Our global teams can be fully operational and supporting you within hours.

Sygnia Sygnia is a global cyber-security technology and services company, providing strategic consulting and incident response support to organizations worldwide, including Fortune 100 companies. As a trusted advisor to technology and security teams, management and boards, Sygnia works with companies to proactively build their cyber-resilience, respond to, and defeat attacks within their networks. The company has offices in Tel-Aviv, London, Singapore and Mexico.
