# Cywareness New Features!!

All-New SIMULATION Library: Prepare for an enhanced simulation experience! Our revamped library now includes card and list layouts, bolstered by an advanced search with an innovative tagging system for all simulations. Additionally, you will have access to edit options and a Preview page, showcasing email templates, landing pages, and micro training materials.

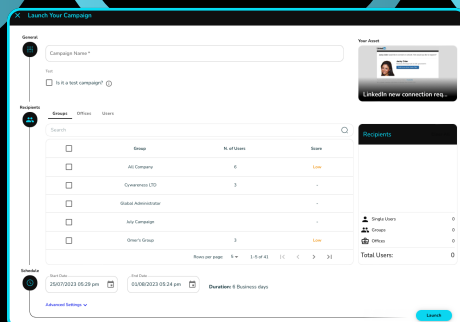

Dashboard Clean-up: The first phase of our new Home Dashboard is now live! We have streamlined the display to present only accurate and relevant data. This is just the beginning, as a feature-rich Home Page, boasting an array of new features and metrics, is set to be deployed soon.
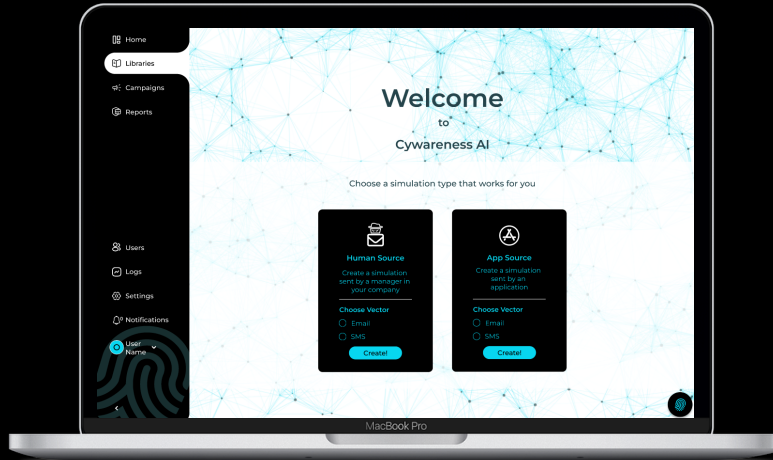

Improved Export Process: Exporting data is now faster and more efficient! Timestamps have been added to simulation user interactions, streamlining data management.
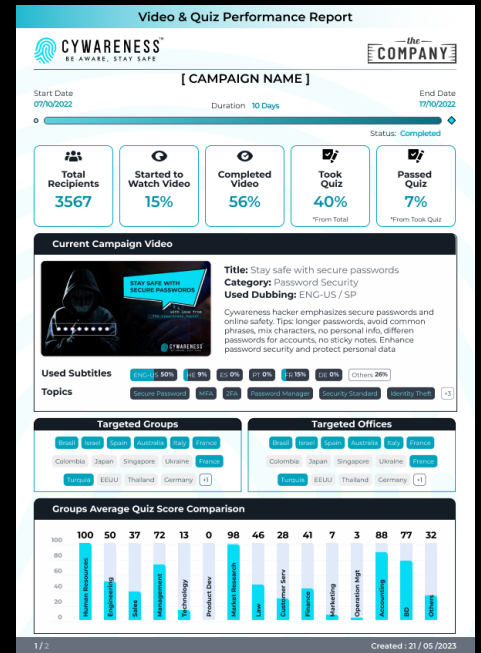

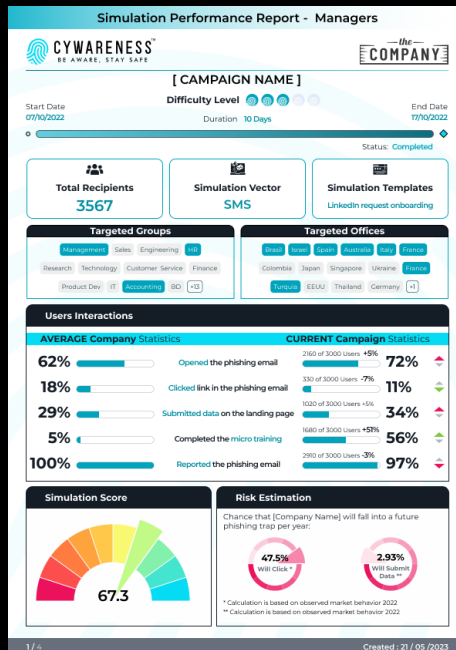

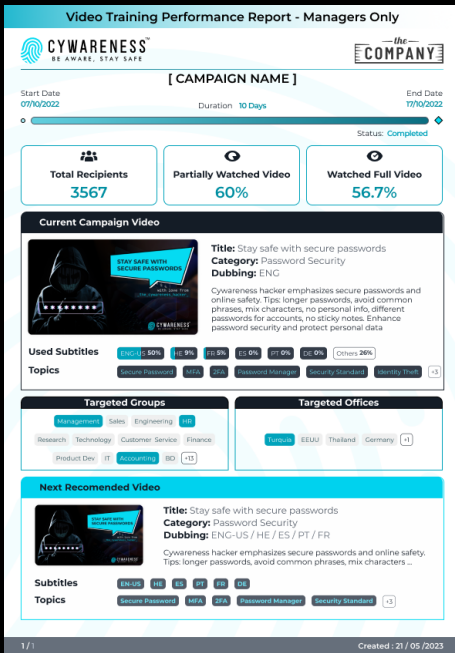

Launch Wizard

Enhanced Wizard Power: Empower your training initiatives with our enhanced wizard, now available for both video training and simulations. This feature unlocks new possibilities for your training strategies.

Select Simulation → **Choose Recipients** → **Schedule Time** → **Launch**

Cywareness Upcoming Features!!

🔹Introducing the AI Phishing Simulation Builder, a powerful tool that revolutionizes the world of cybersecurity training. With this innovative platform, users can effortlessly generate custom phishing simulations, complete with a phishing email, a convincing phishing landing page, and an insightful micro training.

🔹Automatic Performance Report: Get analytics of each simulated attack, from opening an email to inserting data into our phishing page. Cywareness allows you to analyse the performance of each employee, team, department, or even a specific office.

Our analytics also gives you an overview of your employee's performance compared to previous campaigns.
