

Extensive Simulation Library

Unlimited access to a wide range of up-to-date phishing simulations across various topics, allowing you to select the one that suits your geographic preferences, each comprising three essential components:

_Phishing Templates: Precise phishing messages with compelling calls to action

_Landing Pages: Landing pages that mirror the authentic experience, enticing recipients to provide their credentials or personal information

_Micro Training: Offer detailed post-simulation guidance on how to prevent falling victim to phishing attacks. Specific & step by step

Personalized Difficulty Levels

Create tailor made simulations to individuals with 5 distinct difficulty levels

Multiple Attack Vectors

Deploy simulations through various channels, including SMS, email, whatsapp, USB drop attack and more

Effortless Exploration

Utilize advanced search, robust tagging systems, and categorized classifications for a seamless and efficient experience

Unverified Domains

Broaden your cyber security awareness campaigns with the ability to reach beyond verified domains, ensuring comprehensive coverage across your organization.

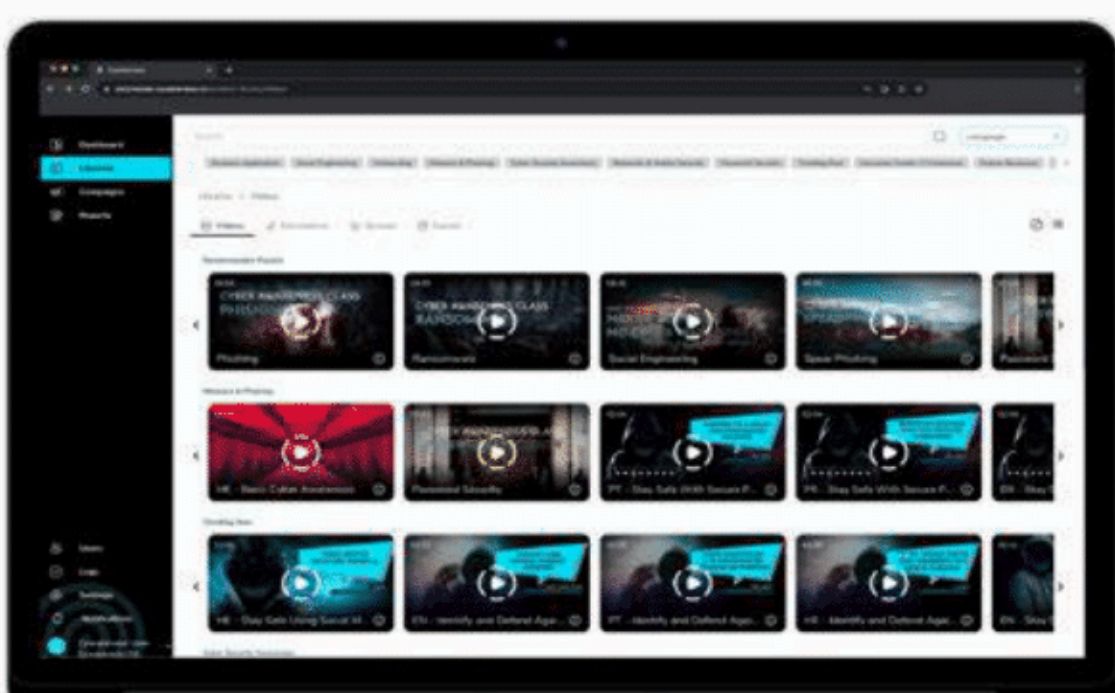

Simulations Library

EXPOSE YOUR EMPLOYEES TO REAL TIME THREATS

Training Video Library

YOUR GATEWAY TO CYBERSECURITY EXCELLENCE

Diverse Content

Access an extensive video library featuring up-to-date content addressing the latest cybersecurity threats, ensuring you stay safe in today's digital landscape

Global Reach

Benefit from language localization with videos available in multiple languages, including dubbing and subtitles, to accommodate diverse audiences

Tailored Learning

Discover curated playlists for comprehensive training programs, streamlining your Cyber Awareness education

Unified Management

Easily upload your own content, enable language localization with a single click, and efficiently manage your entire video library, all in one user-friendly platform

Assess and Improve

Measure your team's knowledge with interactive quizzes after each video, ensuring effective Cyber Awareness training

Unverified Domains

Broaden your cyber security awareness campaigns with the ability to reach beyond verified domains, ensuring comprehensive coverage across your organization.
